**Subject:** Haffner Energy Letter of Support for the HyVelocity Hub: Clean H2 from Texas and the Gulf Coast

Dear Director Crane,

Haffner Energy is pleased to support the "HyVelocity Hub: Clean Hydrogen from Texas and the Gulf Coast", in response to the Department of Energy (DOE) Office of Clean Energy Demonstrations (OCED) Regional Clean Hydrogen Hubs Funding Opportunity Announcement DE-FOA-0002779 (CP Control Number: 2779-1501).

Haffner Energy, a French family company, has been a key player in the transition towards sustainable energy for 30 years. It designs and supplies innovative decarbonization solutions for mobility, industry and local authorities. Its HYNOCA®, SYNOCA® and SAFNOCA® solutions, based on biomass thermolysis, a technology protected by 15 patent families, enable its customers to produce locally renewable hydrogen and gas, as well as other green energies such as Sustainable Aviation Fuel, while capturing carbon from the atmosphere through the co-production of biochar.

The results of this project will modernize and upgrade our nation's energy infrastructure, accelerate our competitiveness, benefit our local communities, and create jobs, while simultaneously supporting efforts to build a clean energy economy that puts us on the path to achieve net-zero emissions economy-wide.

Please feel free to contact me if you have any questions or require any additional information.

Sincerely,

A handwritten signature in black ink, appearing to read 'M. Franchi', written over a light blue horizontal line.

Marcella Franchi
