**Subject:** GKN Hydrogen Letter of Support for the HyVelocity Hub: Clean H2 from Texas and the Gulf Coast

Dear Director Crane,

GKN Hydrogen is pleased to support the "HyVelocity Hub: Clean Hydrogen from Texas and the Gulf Coast", in response to the Department of Energy (DOE) Office of Clean Energy Demonstrations (OCED) Regional Clean Hydrogen Hubs Funding Opportunity Announcement DE-FOA-0002779 (CP Control Number: 2779-1501).

GKN Hydrogen manufactures the most reliable and safe hydrogen storage systems in the world. We are proud to partner with HyVelocity to design and build the most sustainable long-term hydrogen storage system. GKN Hydrogen's metal-hydride storage systems are manufactured from recycled metals, do not require compression or liquefaction for operation, and last for decades without any losses.

The results of this project will modernize and upgrade our nation's energy infrastructure, accelerate our competitiveness, benefit our local communities, and create jobs, while simultaneously supporting efforts to build a clean energy economy that puts us on the path to achieve net-zero emissions economy-wide.

Please feel free to contact me if you have any questions or require any additional information.

Sincerely,

A handwritten signature in brown ink, appearing to read 'J. Petrecky'.
